

Director

Relational Chemical, Product & Compliance Database

Chemical Compliance Systems, Inc. (CCS) has compiled the largest relational chemical and product database. This information is utilized in 33 Web-based proprietary munition and nonmunition/industrial modules. The maturation of these resources parallels increasing demand for these sole source capabilities. We are seeking to identify a highly qualified individual to whom the database maintenance, expansion, quality control, and team management responsibilities can be delegated. CCS is seeking someone with the following credentials:

- Toxicology Ph.D.
- 15+ years of experience in hazard, risk and compliance assessments
- In-depth knowledge and experience with data compilation, evaluation and processing
- Speaking, presentation and/or sales track record
- Effective communication, teambuilding, and hands-on management skills
- Proven desire to work on the “cutting edge”
- Organized and detail oriented
- Flexibility for moderate travel

If you meet these requirements, please e-mail your resume with a letter telling us how/why you fulfill each of these requirements, to:

Ms. Marjorie E. Najafi

Manager, Human Resources
